Where the Data Comes From

Population information is derived from 2020 Census through the Office of Financial Management and updated through the City of Edmonds, Snohomish County and King County.

Historical data regarding our church was drawn from the end of year reports of EUMC.

In addition, this analysis is supported by the American Beliefs Study national survey, which MissionInsite conducts every five (5) years.

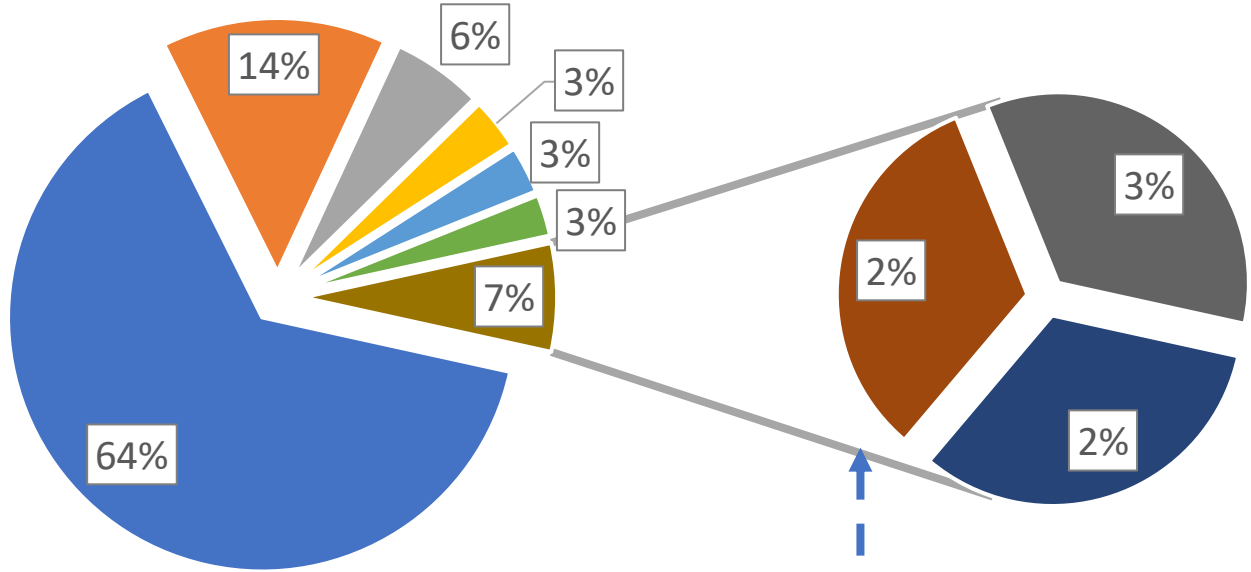

All sets of data are a snapshot in time for planning purposes.

Where we go from here?

- We receive valuable information about each other and our neighbors
- The next step is to find out more information about our neighbors
- Our next meeting is August 27th after worship to learn a tool for one-to-one conversation with our neighbors
- All of this information will be critical in forming our priorities for the next five years
- Thank you for coming and your work as a community to develop our goals
